

Is a giant underground battery being created?

Two caverns, each as deep as the Empire State Building is tall, are being created from a geological salt formation outside Delta, Utah. The caverns are being formed using water to dissolve and remove the salt, effectively creating a giant battery underground.

Should substations include battery storage?

By incorporating battery storage, substations can ensure a continuous and reliable power supply, even during emergencies. Maintenance programs must be expanded to include electrical substation maintenance routines specific to energy storage interfaces. Visit our Substation Maintenance training course.

Are lithium-ion batteries a good choice for grid-scale storage systems?

Recent advancements in battery technology have significantly improved the feasibility and efficiency of grid-scale storage systems. Lithium-ion batteries, known for their high energy density and long cycle life, remain the dominant technology for large-scale applications.

Can battery electric vehicles be used in underground mining?

This guideline describes recommended practices for the use of battery electric vehicles (BEVs) in underground mining. Its intent is to provide guidance and an overall discussion about the benefits, drawbacks, and planning needed to design and implement a BEV fleet within an existing or new mine.
