

What is a battery housing?

The battery housing is the central safety component that must meet the highest standards in terms of sealing, electrical conductivity, mechanical strength, and much more. It essentially consists of a battery lid /cap and a battery can - including the critical interface between these two components.

What is a battery enclosure box?

Battery enclosure boxes also feature locking mechanisms that protect unauthorized people against possible electrical dangers if they happen to be tampering with your equipment. Our battery enclosures can be pole-mounted or ground-mounted and are suitable for indoor and outdoor applications.

What are battery enclosures & cabinets?

Battery enclosures and cabinets are a safe way to store batteries and to protect them from the elements as well as providing a line of defense against theft.

What are the requirements for battery cell housings?

Battery cell housings must meet a wide range of demanding requirements - including the highest standards for sealing, electrical conductivity, mechanical stability, and safety. At the same time, they must be produced flexibly and in large quantities to meet the increasing market demands.
